Reconnaissance Automation Platform Security Assessment Report

Scan Name:	New Scan
Target:	192.168.112.130
Profile:	Standard
Date:	2026-05-10
Approval Ref:	N/A
Total Findings:	23

Executive Summary

Severity	Count
Critical	0
High	3
Medium	2
Low	17
Info	1

Detailed Findings

1. [High] Open port 21/tcp - ftp

Category: open_port | Status: Potential

Description:

Port 21 (tcp) is open on 192.168.112.130 (192.168.112.130). Service detected: ftp 2.3.4.

Nmap scan detected open port 21/tcp with service 'ftp' on 192.168.112.130

Disable FTP if not needed. Use SFTP instead.

2. [High] Open port 23/tcp - telnet

Category: open_port | Status: Potential

Description:

Port 23 (tcp) is open on 192.168.112.130 (192.168.112.130). Service detected: telnet .

Nmap scan detected open port 23/tcp with service 'telnet' on 192.168.112.130

Disable Telnet immediately. Use SSH instead.

3. [High] Open port 445/tcp - netbios-ssn

Category: open_port | Status: Potential

Description:

Port 445 (tcp) is open on 192.168.112.130 (192.168.112.130). Service detected: netbios-ssn 3.X - 4.X.

Nmap scan detected open port 445/tcp with service 'netbios-ssn' on 192.168.112.130

Disable SMB if not needed. Apply latest patches.

4. [Medium] Open port 22/tcp - ssh

Category: open_port | Status: Potential

Description:

Port 22 (tcp) is open on 192.168.112.130 (192.168.112.130). Service detected: ssh 4.7p1 Debian 8ubuntu1.

Nmap scan detected open port 22/tcp with service 'ssh' on 192.168.112.130

Restrict SSH access to trusted IPs only. Disable root login.

5. [Medium] Open port 139/tcp - netbios-ssn

Category: open_port | Status: Potential

Description:

Port 139 (tcp) is open on 192.168.112.130 (192.168.112.130). Service detected: netbios-ssn 3.X - 4.X.

Nmap scan detected open port 139/tcp with service 'netbios-ssn' on 192.168.112.130

Restrict NetBIOS access. Apply firewall rules.

6. [Low] Open port 25/tcp - smtp

Category: open_port | Status: Potential

Description:

Port 25 (tcp) is open on 192.168.112.130 (192.168.112.130). Service detected: smtp .

Nmap scan detected open port 25/tcp with service 'smtp' on 192.168.112.130

Review this service and restrict access if not needed.

7. [Low] Open port 53/tcp - domain

Category: open_port | Status: Potential

Description:

Port 53 (tcp) is open on 192.168.112.130 (192.168.112.130). Service detected: domain 9.4.2.

Nmap scan detected open port 53/tcp with service 'domain' on 192.168.112.130

Review this service and restrict access if not needed.

8. [Low] Open port 111/tcp - rpcbind

Category: open_port | Status: Potential

Description:

Port 111 (tcp) is open on 192.168.112.130 (192.168.112.130). Service detected: rpcbind 2.

Nmap scan detected open port 111/tcp with service 'rpcbind' on 192.168.112.130

Review this service and restrict access if not needed.

9. [Low] Open port 512/tcp - exec

Tool:

Category: open_port | Status: Potential

Description:

Port 512 (tcp) is open on 192.168.112.130 (192.168.112.130). Service detected: exec .

Evide

Nmap scan detected open port 512/tcp with service 'exec' on 192.168.112.130

Reco

Review this service and restrict access if not needed.

10. [Low] Open port 513/tcp - login

Tool:

Category: open_port | Status: Potential

Description:

Port 513 (tcp) is open on 192.168.112.130 (192.168.112.130). Service detected: login .

Evide

Nmap scan detected open port 513/tcp with service 'login' on 192.168.112.130

Reco

Review this service and restrict access if not needed.

11. [Low] Open port 514/tcp - tcpwrapped

Tool:

Category: open_port | Status: Potential

Description:

Port 514 (tcp) is open on 192.168.112.130 (192.168.112.130). Service detected: tcpwrapped .

Evide

Nmap scan detected open port 514/tcp with service 'tcpwrapped' on 192.168.112.130

Reco

Review this service and restrict access if not needed.

12. [Low] Open port 1099/tcp - java-rmi

Tool:

Category: open_port | Status: Potential

Description:

Port 1099 (tcp) is open on 192.168.112.130 (192.168.112.130). Service detected: java-rmi .

Evide

Nmap scan detected open port 1099/tcp with service 'java-rmi' on 192.168.112.130

Review this service and restrict access if not needed.

13. [Low] Open port 1524/tcp - bindshell

Category: open_port | Status: Potential

Description:

Port 1524 (tcp) is open on 192.168.112.130 (192.168.112.130). Service detected: bindshell .

Nmap scan detected open port 1524/tcp with service 'bindshell' on 192.168.112.130

Review this service and restrict access if not needed.

14. [Low] Open port 2049/tcp - nfs

Category: open_port | Status: Potential

Description:

Port 2049 (tcp) is open on 192.168.112.130 (192.168.112.130). Service detected: nfs 2-4.

Nmap scan detected open port 2049/tcp with service 'nfs' on 192.168.112.130

Review this service and restrict access if not needed.

15. [Low] Open port 2121/tcp - ftp

Category: open_port | Status: Potential

Description:

Port 2121 (tcp) is open on 192.168.112.130 (192.168.112.130). Service detected: ftp 1.3.1.

Nmap scan detected open port 2121/tcp with service 'ftp' on 192.168.112.130

Review this service and restrict access if not needed.

16. [Low] Open port 3306/tcp - mysql

Category: open_port | Status: Potential

Description:

Port 3306 (tcp) is open on 192.168.112.130 (192.168.112.130). Service detected: mysql 5.0.51a-3ubuntu5.

Nmap scan detected open port 3306/tcp with service 'mysql' on 192.168.112.130

Review this service and restrict access if not needed.

17. [Low] Open port 5432/tcp - postgresql

Category: open_port | Status: Potential

Description:

Port 5432 (tcp) is open on 192.168.112.130 (192.168.112.130). Service detected: postgresql 8.3.0 - 8.3.7.

Nmap scan detected open port 5432/tcp with service 'postgresql' on 192.168.112.130

Review this service and restrict access if not needed.

18. [Low] Open port 5900/tcp - vnc

Category: open_port | Status: Potential

Description:

Port 5900 (tcp) is open on 192.168.112.130 (192.168.112.130). Service detected: vnc .

Nmap scan detected open port 5900/tcp with service 'vnc' on 192.168.112.130

Review this service and restrict access if not needed.

19. [Low] Open port 6000/tcp - X11

Category: open_port | Status: Potential

Description:

Port 6000 (tcp) is open on 192.168.112.130 (192.168.112.130). Service detected: X11 .

Nmap scan detected open port 6000/tcp with service 'X11' on 192.168.112.130

Review this service and restrict access if not needed.

20. [Low] Open port 6667/tcp - irc

Category: open_port | Status: Potential

Description:

Port 6667 (tcp) is open on 192.168.112.130 (192.168.112.130). Service detected: irc .

Nmap scan detected open port 6667/tcp with service 'irc' on 192.168.112.130

Review this service and restrict access if not needed.

21. [Low] Open port 8009/tcp - ajp13

Category: open_port | Status: Potential

Description:

Port 8009 (tcp) is open on 192.168.112.130 (192.168.112.130). Service detected: ajp13 .

Nmap scan detected open port 8009/tcp with service 'ajp13' on 192.168.112.130

Review this service and restrict access if not needed.

22. [Low] Open port 8180/tcp - http

Category: open_port | Status: Potential

Description:

Port 8180 (tcp) is open on 192.168.112.130 (192.168.112.130). Service detected: http 1.1.

Nmap scan detected open port 8180/tcp with service 'http' on 192.168.112.130

Review this service and restrict access if not needed.

23. [Info] Open port 80/tcp - http

Category: open_port | Status: Potential

Description:

Port 80 (tcp) is open on 192.168.112.130 (192.168.112.130). Service detected: http 2.2.8.

Nmap scan detected open port 80/tcp with service 'http' on 192.168.112.130

Ensure web server is patched and properly configured.

Methodology

This assessment was conducted using AutoRed v1.0, a GUI-based reconnaissance automation platform. The scan targeted 192.168.112.130 using the Standard scan profile. Tools used included Nmap for port scanning, Subfinder for subdomain discovery, httpx for live host identification, WhatWeb for technology fingerprinting, and ffuf for directory enumeration. All findings were automatically parsed, normalized, deduplicated and severity-scored before being presented in this report.
