Reconnaissance Automation Platform
Security Assessment Report

Scan Name:	Test Scan
Target:	192.168.112.130
Profile:	Standard
Date:	2026-05-10
Approval Ref:	N/A
Total Findings:	0

Executive Summary

Severity	Count
Critical	0
High	0
Medium	0
Low	0
Info	0

Finding Distribution:

Detailed Findings

Methodology

Target: 192.168.112.130

Profile: Standard

Tools used: Nmap, Subfinder, httpx, WhatWeb, ffuf

This assessment was conducted using AutoRed v1.0, a GUI-based reconnaissance automation platform developed as a Final Year Project at APU.

All findings were automatically parsed, normalized, deduplicated and severity-scored before presentation.

Tools Summary:

Nmap	- Port scanning and service version detection
Subfinder	- Passive subdomain enumeration via OSINT
httpx	- HTTP probing to identify live web hosts
WhatWeb	- Web technology fingerprinting
ffuf	- Fast directory and endpoint fuzzing
